# Database-Backed Websites

#### No screens

Prof. Lydia Chilton COMS 4170 21 February 2018

Goal 1

#### Build websites that suit the needs and abilities of users

# The main goal of many websites is to display information users need.

#### This website has no database

to Negotiate a Deal
By THE NEW YORK TIMES

By THE NEW YORK TIMES 49 minutes ago

- The government will shut down at 12:01 a.m. Saturday if lawmakers fail to get an agreement on some kind of spending bill.
- With Democrats balking, President Trump canceled plans to travel to his Florida resort and contacted Senator Chuck Schumer, the Democratic leader.
- · Timeline: How Congress Got to the Brink of a Shutdown
- · Right and Left React to Prospect of Shutdown

"We are not going to desert these young people," he said, referring to DACA beneficiaries.

Senator Bernie Sanders of Vt.

#### How the Debate in Congress Breaks Down

By ALICIA PARLAPIANO and WILSON ANDREWS
Lawmakers have until Friday at midnight to pass a short-term spending bill to avoid a government shutdown.

#### Senate to Vote With Shutdown at Stake

By THOMAS KAPLAN and SHERYL GAY STOLBERG 44 minutes ago
Senate Democrats appear ready to block legislation to keep the
government funded past midnight, gambling that Mr. Trump will
offer concessions on immigration and other issues.

# Database-backed Websites

## This class is not about backend development

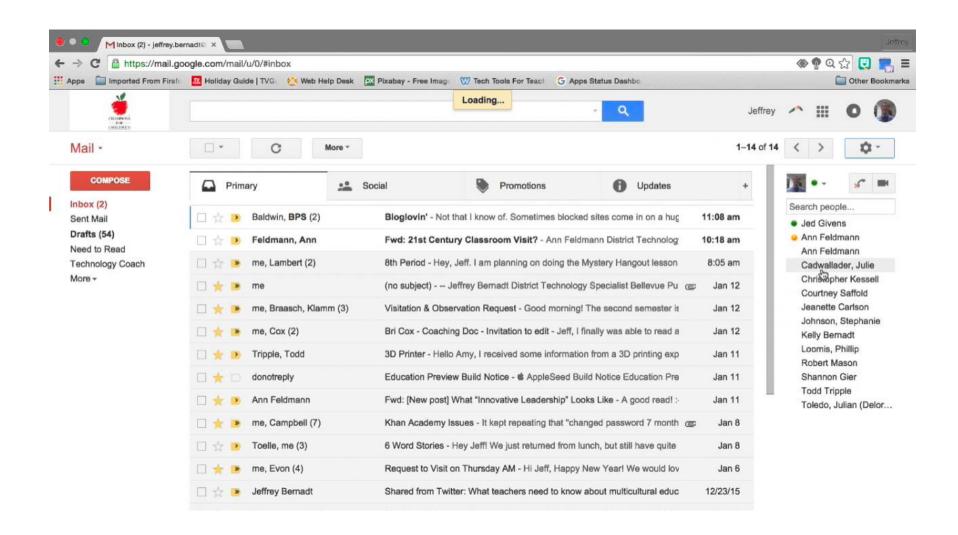

But front-ends and back-ends are tightly coupled. So you need to know something about back-end databases To create awesome websites

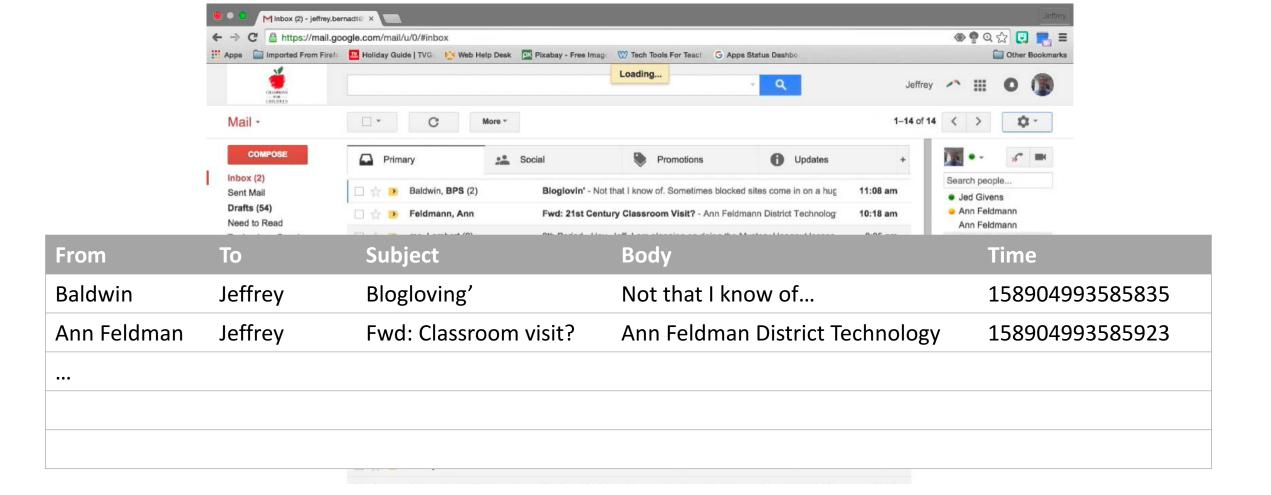

# Interacting with Databases

CRUD: Create, Read, Update Delete

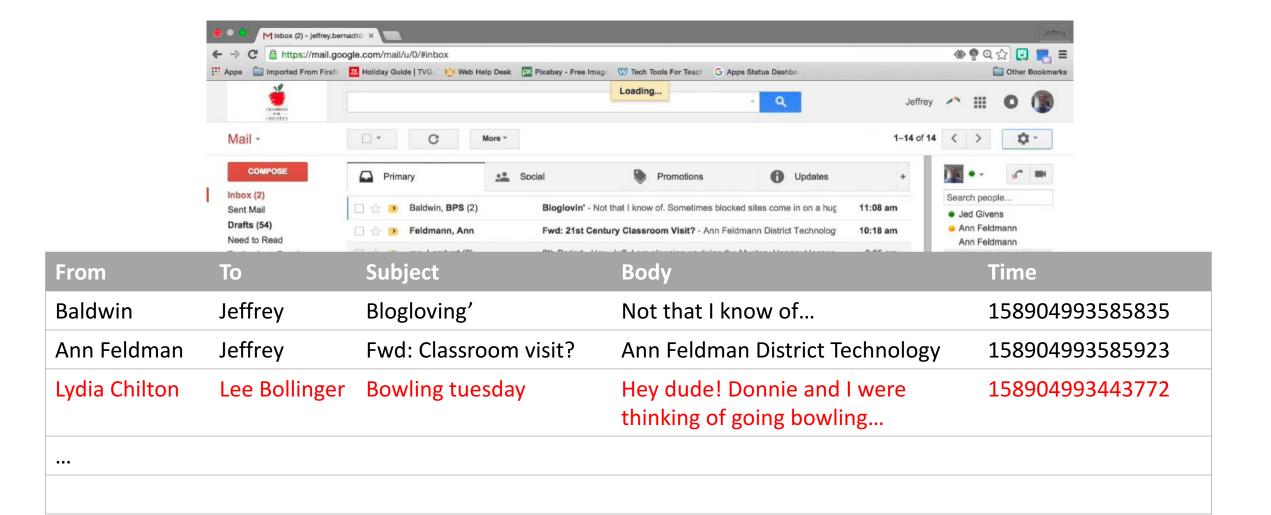

#### Gmail is a database of emails

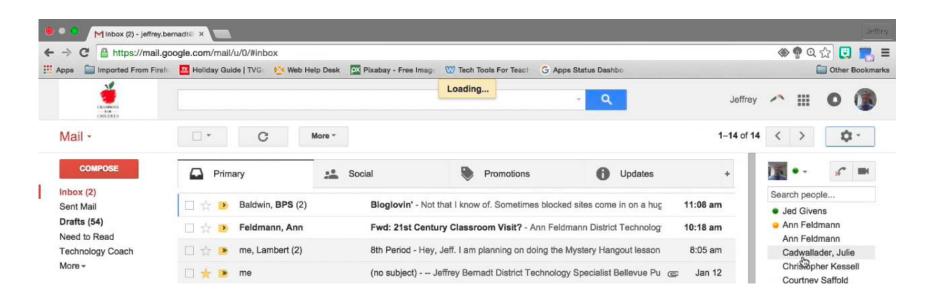

# What are the key bits of information stored for each **email**?

# Remember: Multiple users' data stored in one database

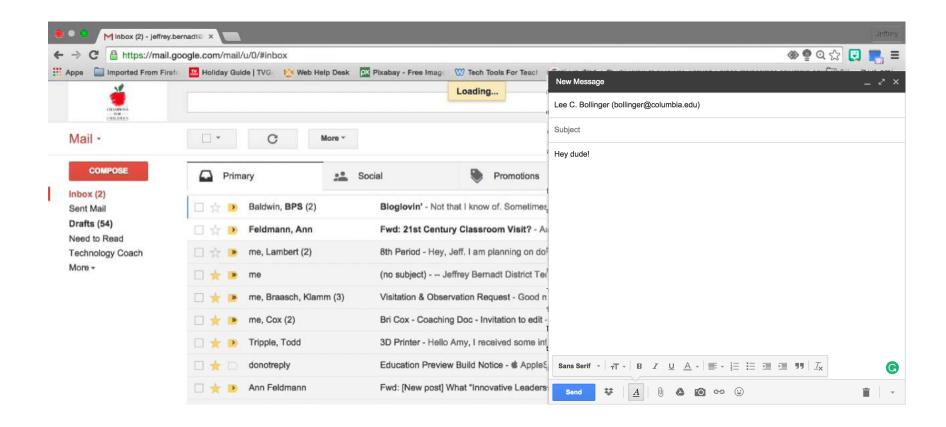

# Most websites allow users to: Create, Read, Update, and Delete Data

From	То	Subject	Body	Time
Baldwin	Jeffrey	Blogloving'	Not that I know of	158904993585835
Ann Feldman	Jeffrey	Fwd: Classroom visit?	Ann Feldman District Technology	158904993585923
Lydia Chilton	Lee Bollinger	Bowling tuesday	Hey dude! Donnie and I were thinking of going bowling	158904993443772

### **CREATE**: How do users create data in GMail?

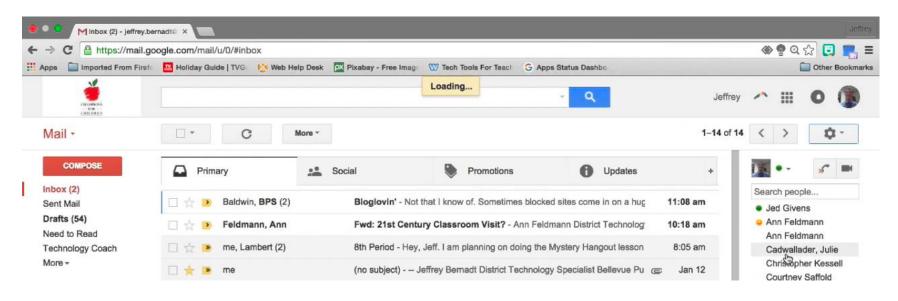

INSERT INTO emails (To, From, Subject, Body, time)

VALUES ("Baldwin", "Jeffrey", "Bloglovin", "not that I know of", NOW)

#### **READ**: How do users read data in GMail?

How do they see different portions of the database?

Select \* FROM emails
WHERE (to = "Jeffrey")
ORDER BY time DESCENDING
LIMIT 30

WHY NOT THIS?
Select FROM emails WHERE
(to = "Jeffrey" OR from = "Jeffrey")

#### **READ**: How do users read data in GMail?

How do they see different portions of the database?

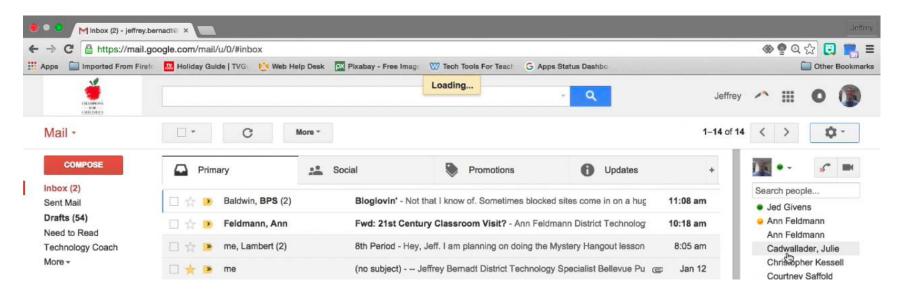

ID	From	То	Subject	Body	Response to	Time
1	Baldwin	Jeffrey	Blogloving'	Not that I know of		158904993585
2	Ann Feldman	Jeffrey	Fwd: Classroom visit?	Ann Feldman District Technology		158904993585
3 · c	Jeffrey	Lambert	8 <sup>th</sup> Period	Hey Lambert,	0	158904993589
4	Lambert	Jeff		Hey Jeff,	3	158904993599
COMPOSE		Social	Promotions 6	Updates +		
nbox (2) Sent Mail Drafts (54)	Baldwin, BPS (2)	Bioglovin' - Not	that I know of. Sometimes blocked sites come in the Classroom Visit? - Ann Feldmann District	n on a hug 11:08 am Search people  Jed Givens  Fechnolog: 10:18 am Ann Feldmann		
chnology Coach	me, Lambert (2)		Jeff. I am planning on doing the Mystery Hange	Christopher Kessell		

My\_emails\_id = Select \* FROM emails WHERE (to = "Jeffrey")

Select \* FROM emails WHERE (responseTo IN My\_email\_ids)

# **UPDATE**: How do users update data in GMail?

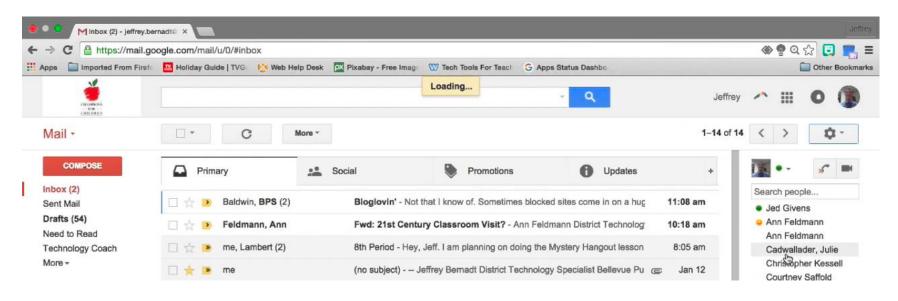

What do they update? And how do they do it in the interface?

UPDATE email\_table SET starred = True WHERE email\_id="123456"

#### **DELETE**: How do users delete data in GMail?

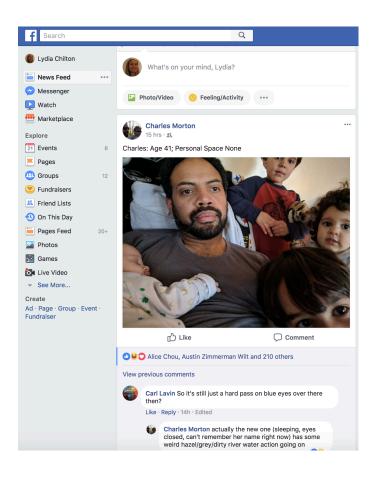

First, what objects can be deleted in GMail?

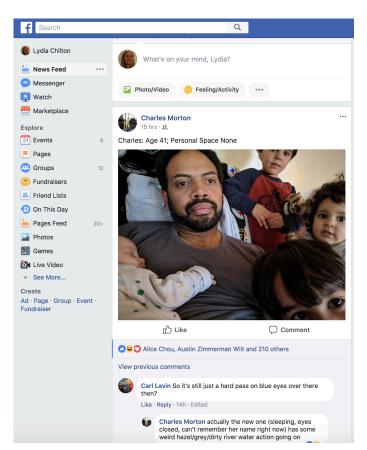

DELETE FROM email\_drafts\_table WHERE id="123456"

```
UPDATE email_table
SET mark_as_deleted = True
WHERE email_id="123456"
```

## Facebook is a database of posts.

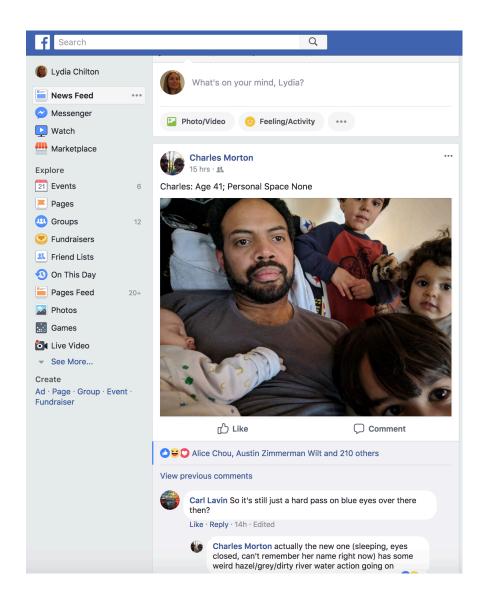

# What fields are in the Facebook posts database?

creator	text	Likes	rime
Charles Morton	Charles Age 41: Personal	210	15890499358

Likos Timo

### **CREATE**: How do users create data in Facebook?

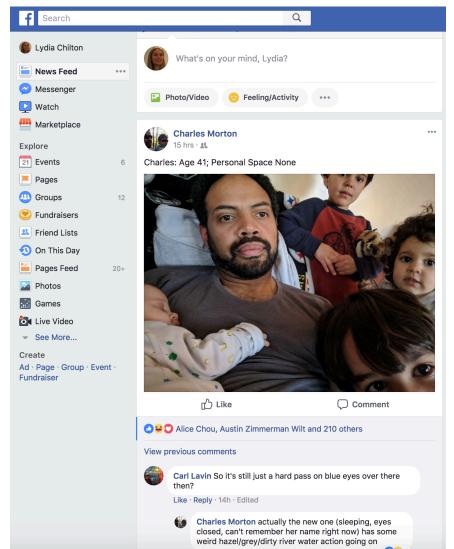

INSERT INTO posts (creator, text, likes, time)

VALUES
("Charles Morton",
"Charles: Age 41: Personal Space None <img src="">"
0,
NOW())

#### **READ**: How do users read data in Facebook?

How do they see different portions of the database?

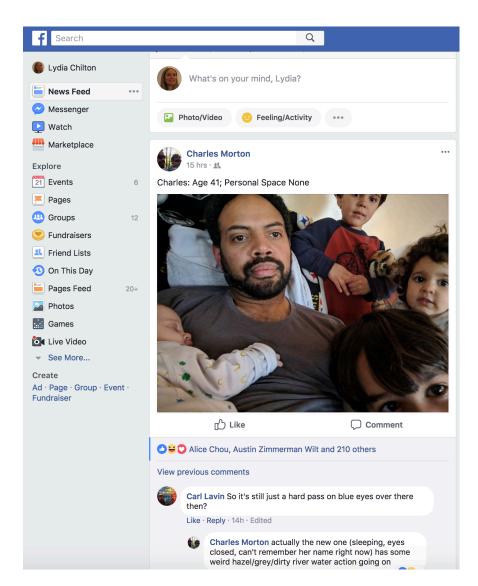

```
my_friends =
```

Select \* FROM Friends WHERE friend1="Lydia Chilton"

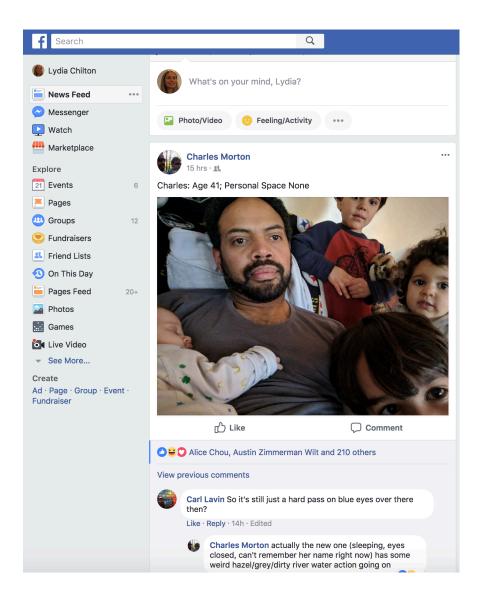

Select \* FROM posts WHERE (creator in my friends)

## **UPDATE**: How do users update data in Facebook?

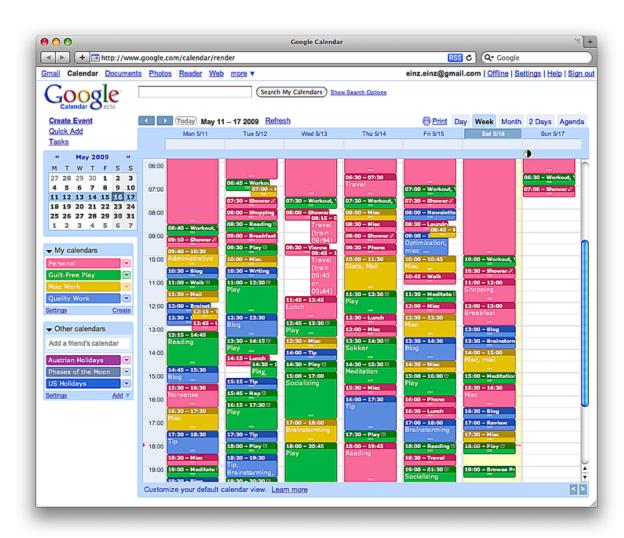

UPDATE posts
INCREMENT likes
WHERE post\_id = "123345"

#### **DELETE**: How do users delete data in Facebook?

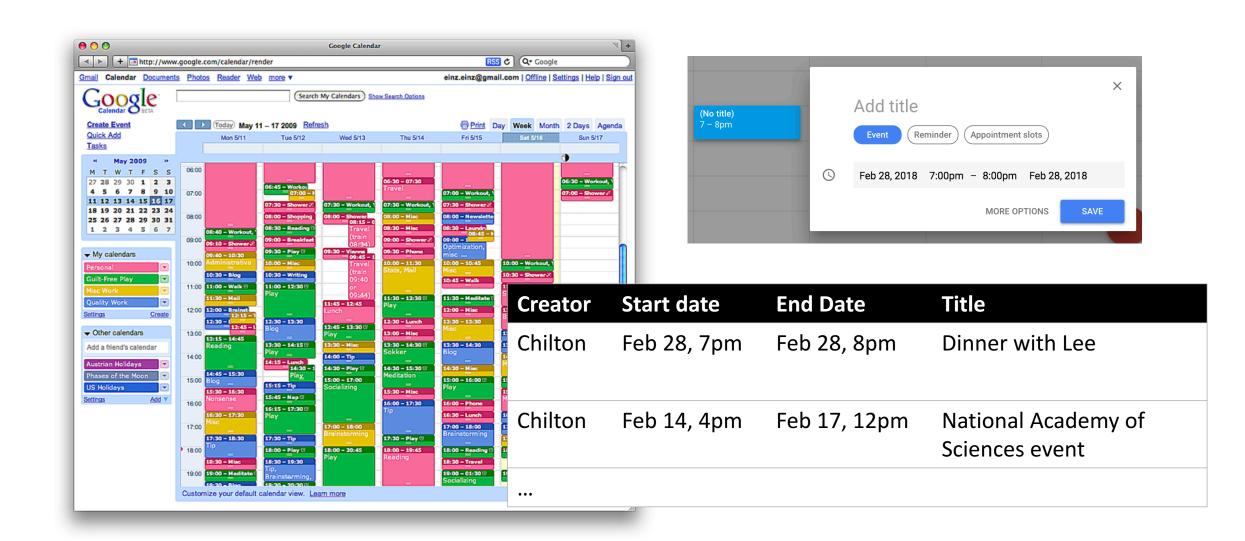

DELETE FROM posts
WHERE post\_id = "123456"

# What fields are in the Calendar events database?

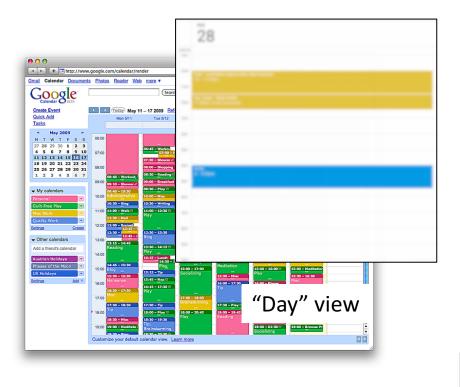

### **CREATE**: How do users create data in Calendar?

### **READ**: How do users read data in Calendar?

How do they see different portions of the database?

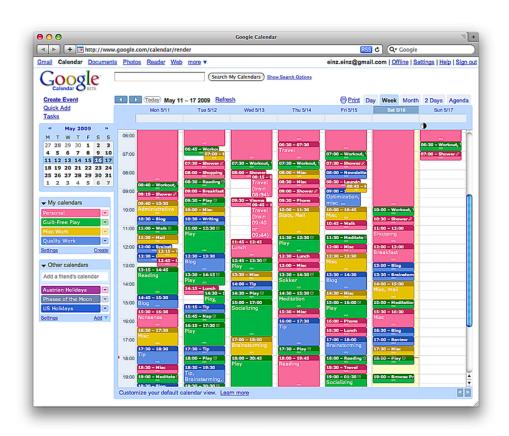

"Week" view

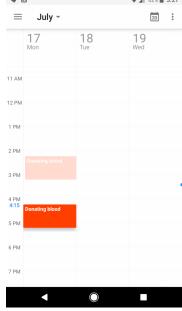

"Month" view

Creator	Start date	<b>End Date</b>	Title
Chilton	Feb 28, 7pm	Feb 28, 8pm	Dinner with Lee
Chilton	Feb 14, 4pm	Feb 17, 12pm	National Academy of Sciences event

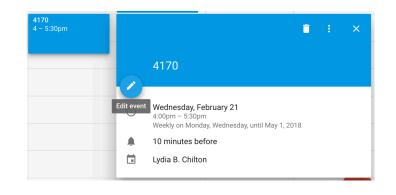

# **UPDATE**: How do users update data in Calendar?

## Drag and drop

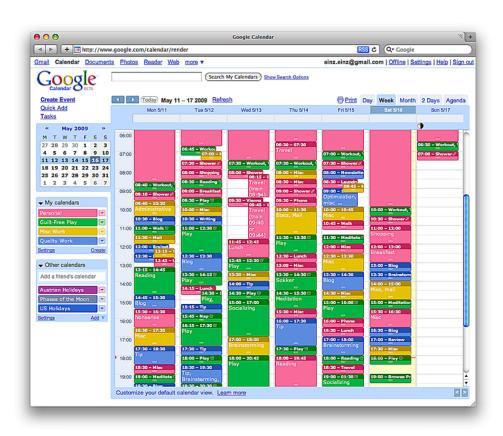

#### Select an event and edit a form

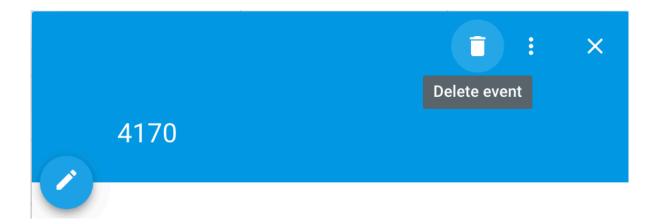

### **DELETE**: How do users delete data in Calendar?

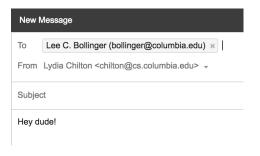

Selecting an event and clicking delete

## What is **statically** generated on the Craigslist homepage?

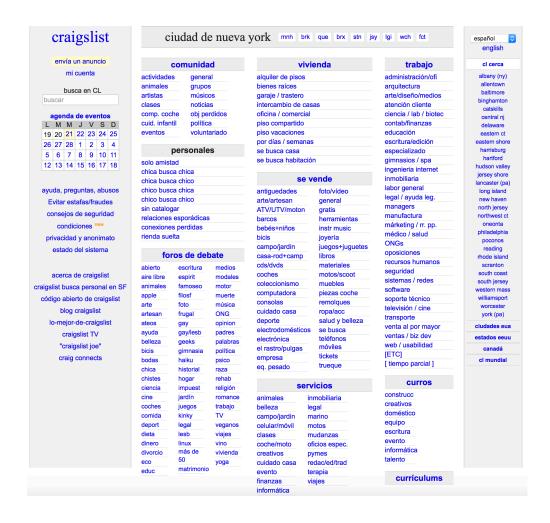

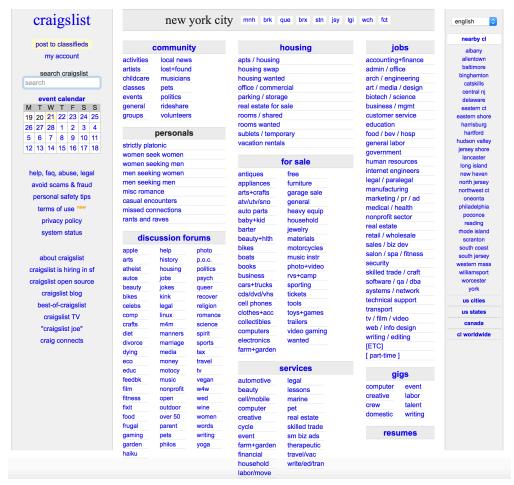

## What is **dynamically** generated on the Craigslist homepage?

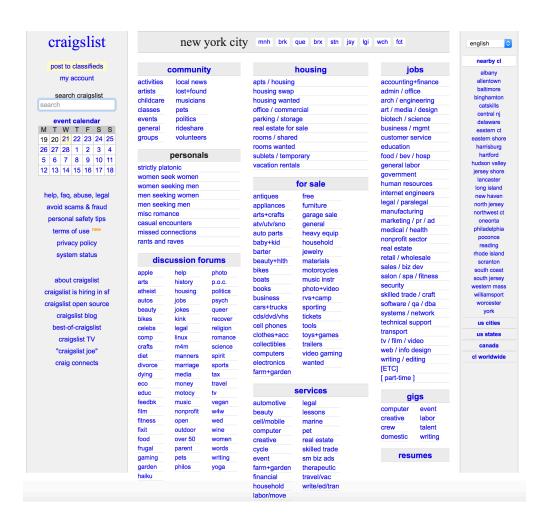

## What is statically generated on the Craigslist homepage?

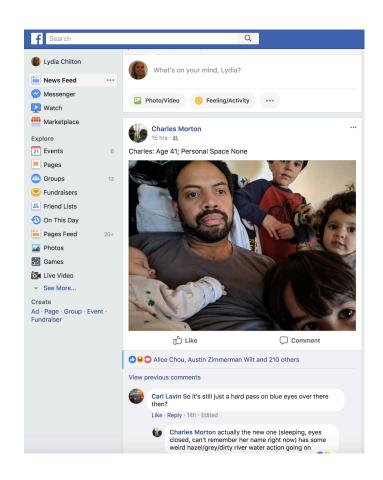

# AJAX: Updating portions of the page from the database

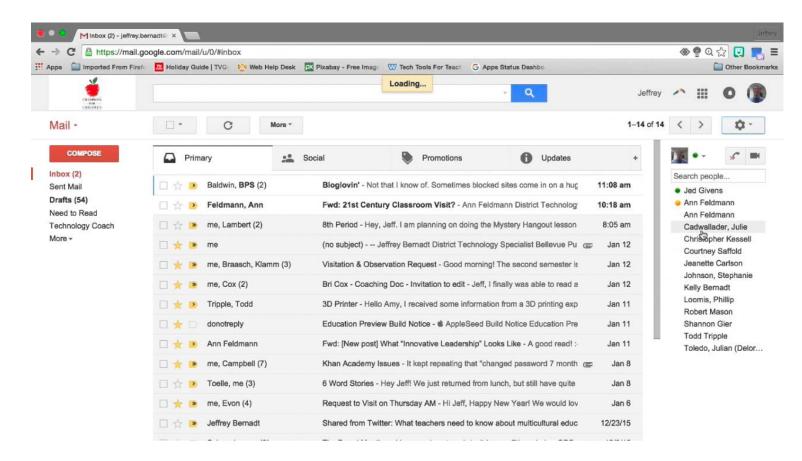

### These pages do not update once loaded

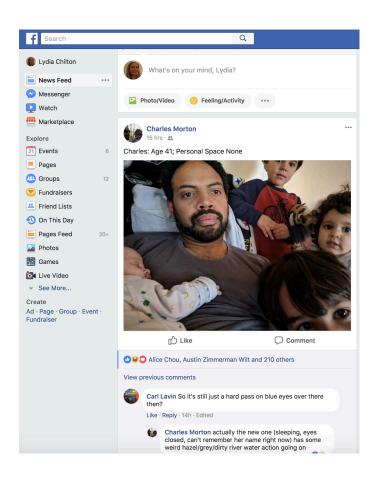

### These pages DO update once loaded

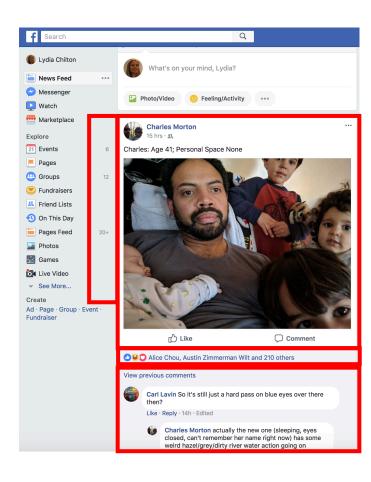

### What portions of this page update?

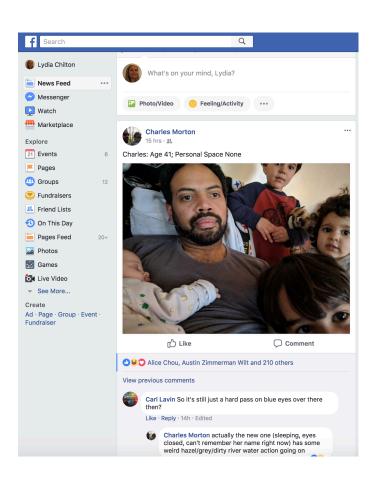

### What portions of this page update?

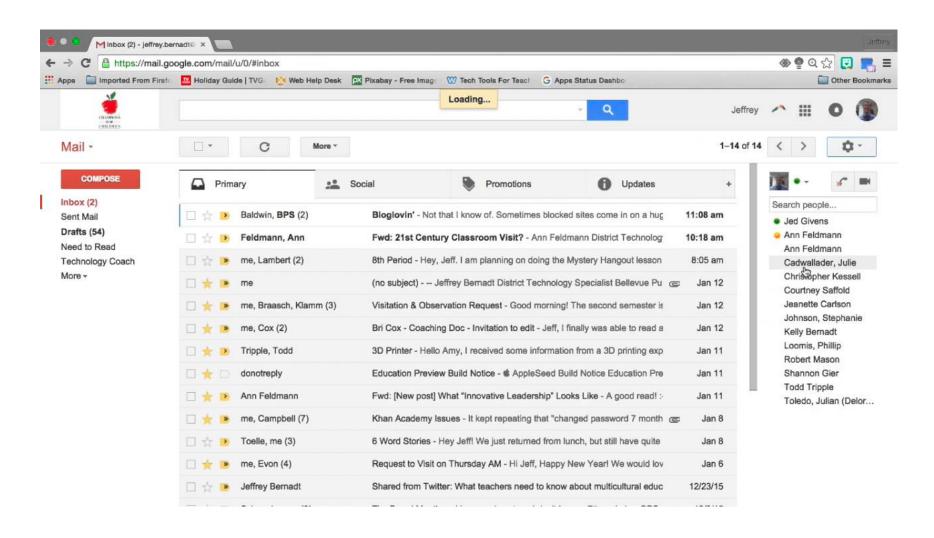

### What portions of this page DO NOT update?

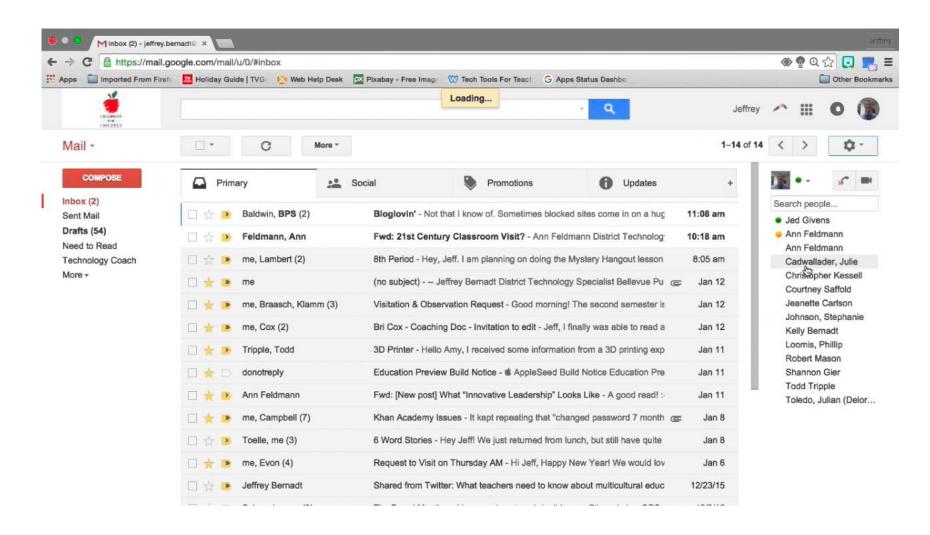

### What portions of this page DO NOT update?

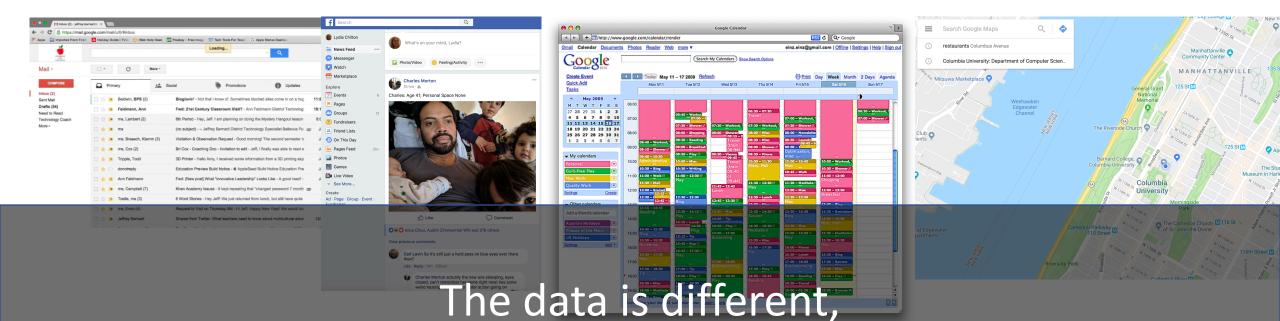

### What portions of this page update?

#### What portions of this page DO NOT update?

# From a back-end perspective Facebook, Gmail are very similar. What's different?

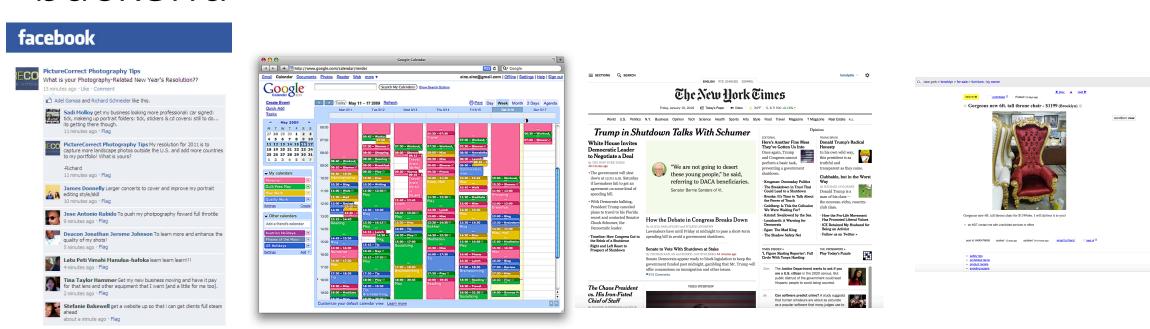

And the information needs they serve are different.

You can drive a lot of human behavior with one database update.

### Summary

### Sites with lots of data have a database in the backend

Front-ends and back-ends are tightly coupled.

So you need to know something about back-end databases

To create awesome websites

### CRUD: Operations for interacting with a database

#### Create

#### Read

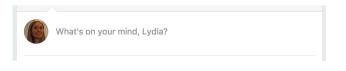

#### **U**pdate

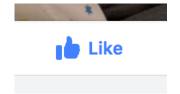

#### **D**elete

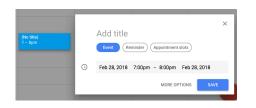

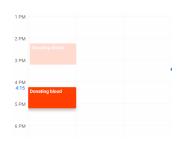

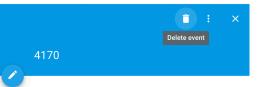

## Use templates to for dynamically generate pages from data in the database

Title	Plot summary	poster	year
The Big Lebowski	"The dude" Lebowski, mistaken	Lebowski.jpg	1998
The Big Short	In 2006-7 a group of investors	Big_short.jpg	2015
The Big Chill	A group of 7 former roommates	Big_chill.jpg	1983

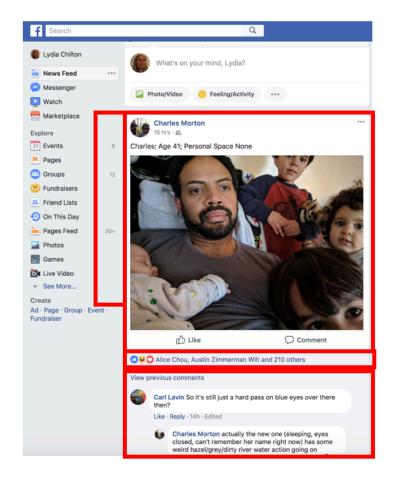

### Some sites reload portions of the page

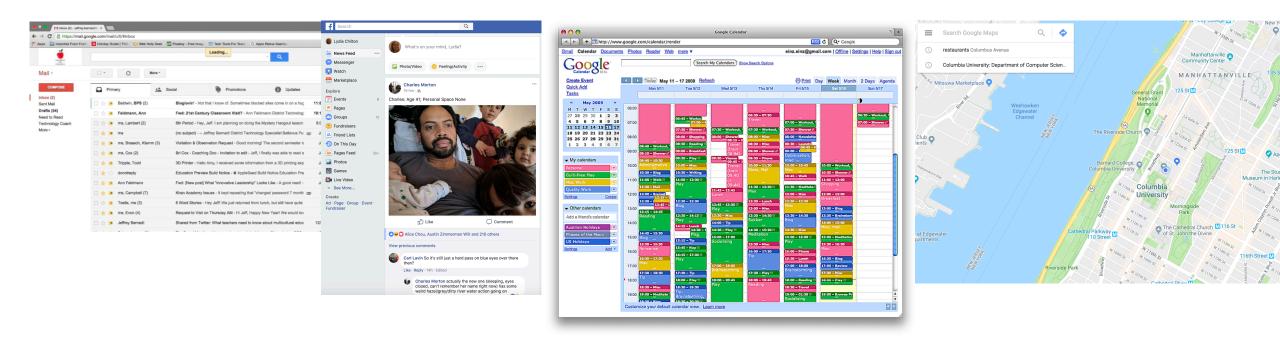

#### Does not reload

#### Reloads

## From a back-end perspective Database-backed websites are very similar.

But they serve different data and different information needs
